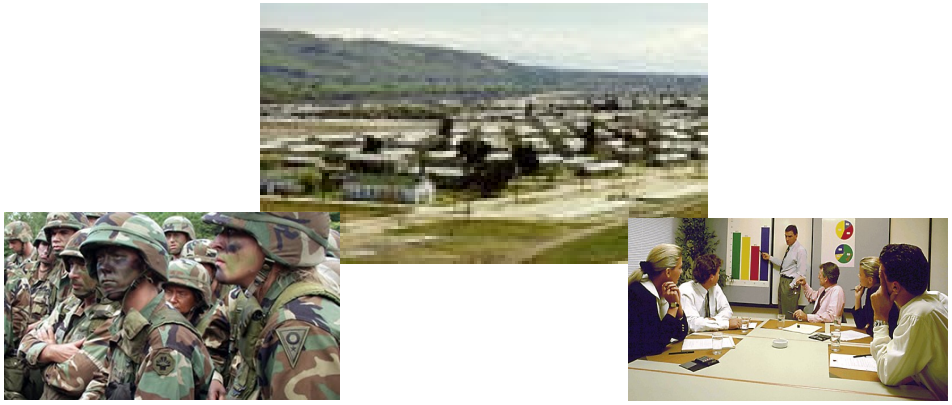
ARMY STATIONING AND INSTALLATION PLAN (ASIP)

Personnel by Unit by Location for POM Period

2006 Training for IMA Regions, USAR, Division, and Installations



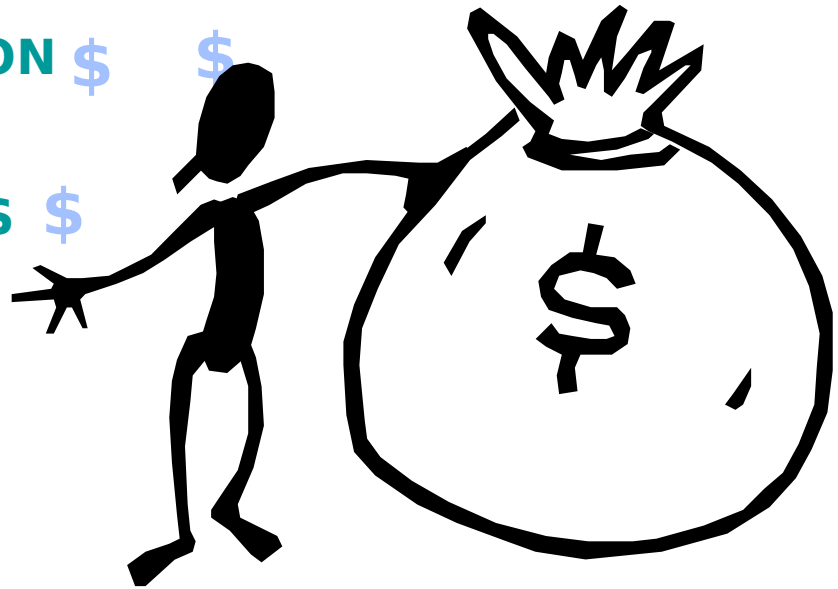
Class Agenda

1. Understanding the ASIP
2. Overview of the ASIP Year
3. Year-Round Tasks
4. Preparing for the Edit Cycle
5. The ASIP Edit Cycle
6. Certification
7. After the ASIP Lock
8. Future Issues
9. Recap
10. Hands-on Training

Understanding the ASIP

MILCON $ $

BASOPS $



Understanding the ASIP

1. ASIP in the OACSIM Enterprise
2. What information is in the ASIP?
3. Where can I find ASIP Information?
4. How is the ASIP created?
5. How is the ASIP maintained?
6. Where do I go for help?

What is the ASIP?

The official Department of the Army database that reflects the authorized planning population for Army Installations. **(Paragraph 1-1, AR 5-18)**

ASIP provides installation population to all OACSIM systems and is the basis for developing Base Operations (BASOPS) and Military Construction (MILCON) requirements.

Acronyms Used in the OACSIM Enterprise

ASIP – Army Stationing and Installations Plan
AIM-HI – Army Installation Management - Headquarters Information
BASOPS – Base Operations
DoD – Department of Defense
EIS – Enterprise Information System
FAS – Facilities Analysis Services
IFS – Integrated Facilities System
ISR – Installation Status Report
MILCON – Military Construction
OACSIM – Office Assistant Chief Staff Installation Management
OSD FSM – Office of the Secretary of Defense Facilities Sustainment Model
POM – Program Objective Memorandum (Army Budget input to DoD)
Pop – Population
PRIDE – Planning Resource for Infrastructure Development and Evaluation (Army National Guard RPI System)
PRV – Plant Replacement Value
RPI – Real Property Inventory
RPLANS – Real Property Planning and Analysis System
SBC – Service Based Costing

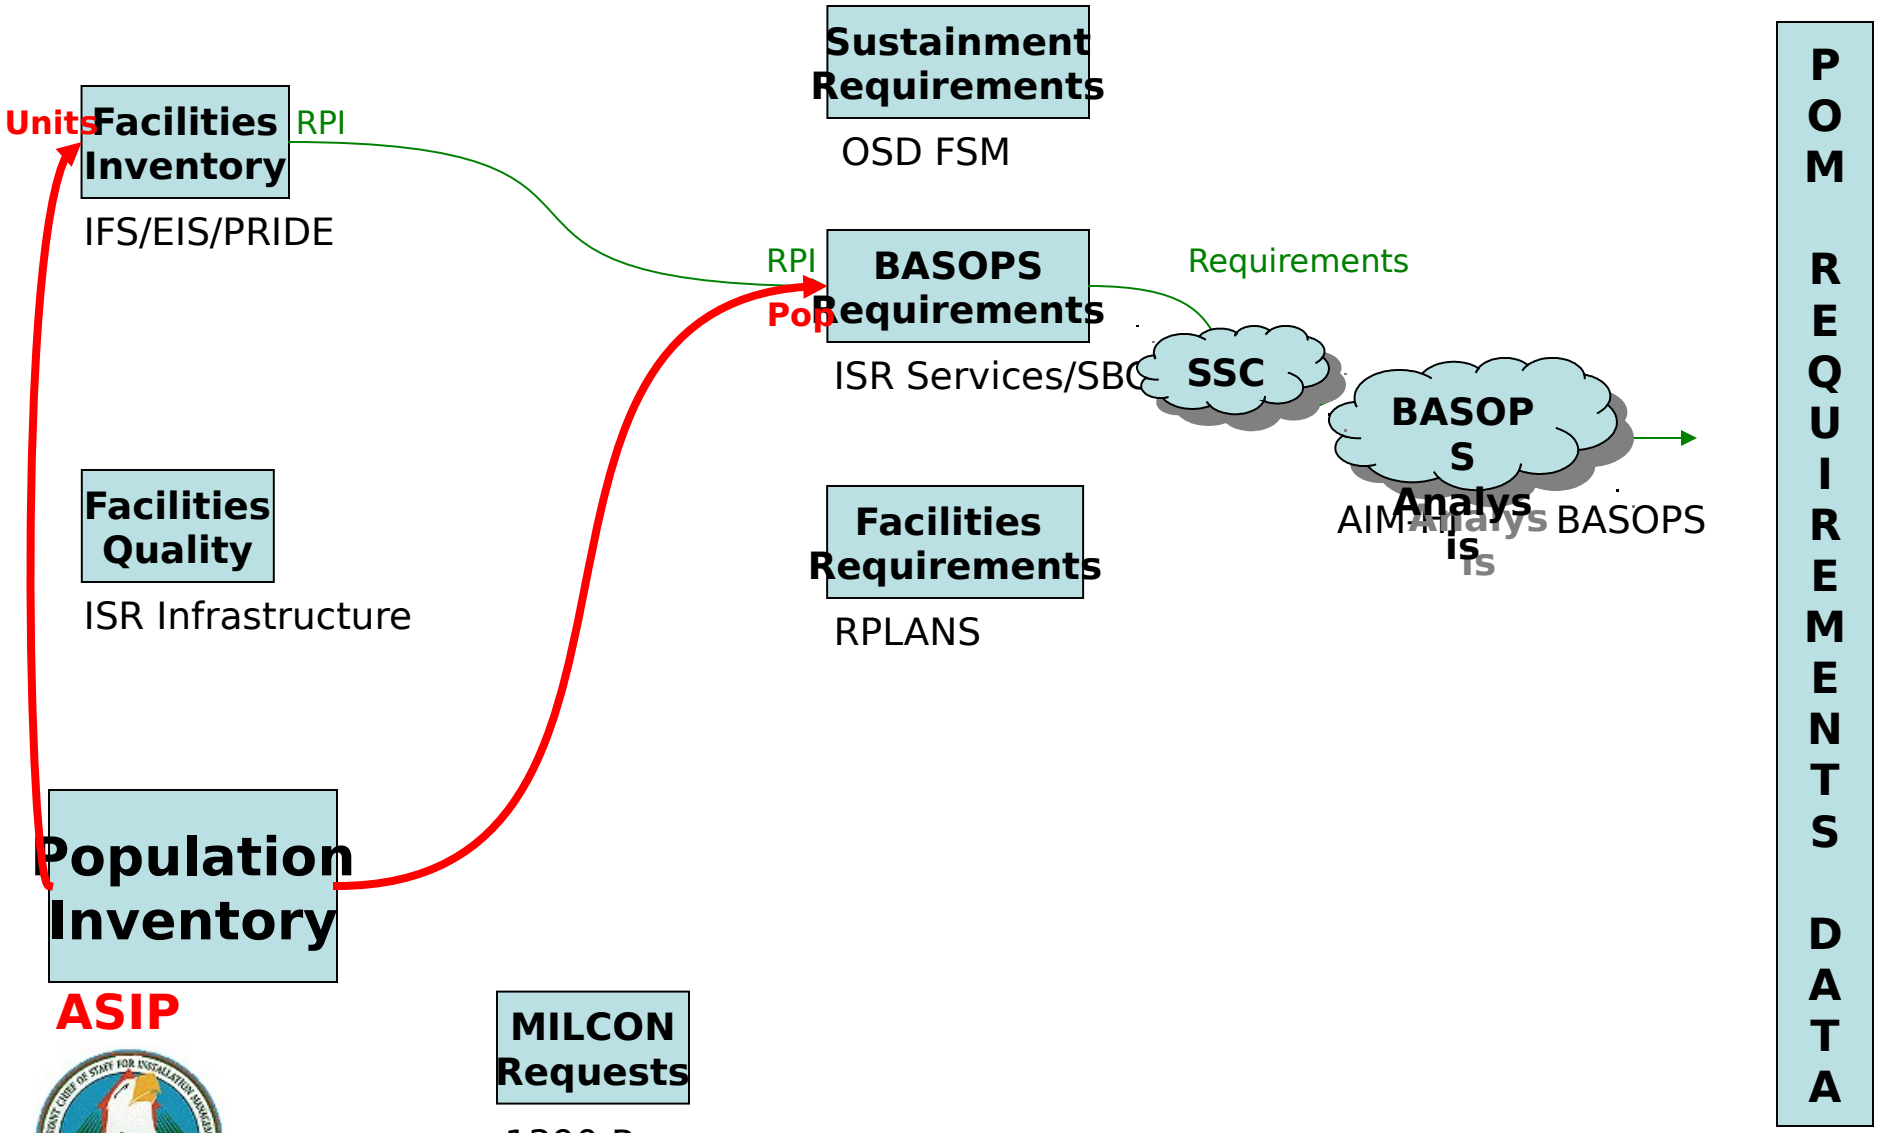
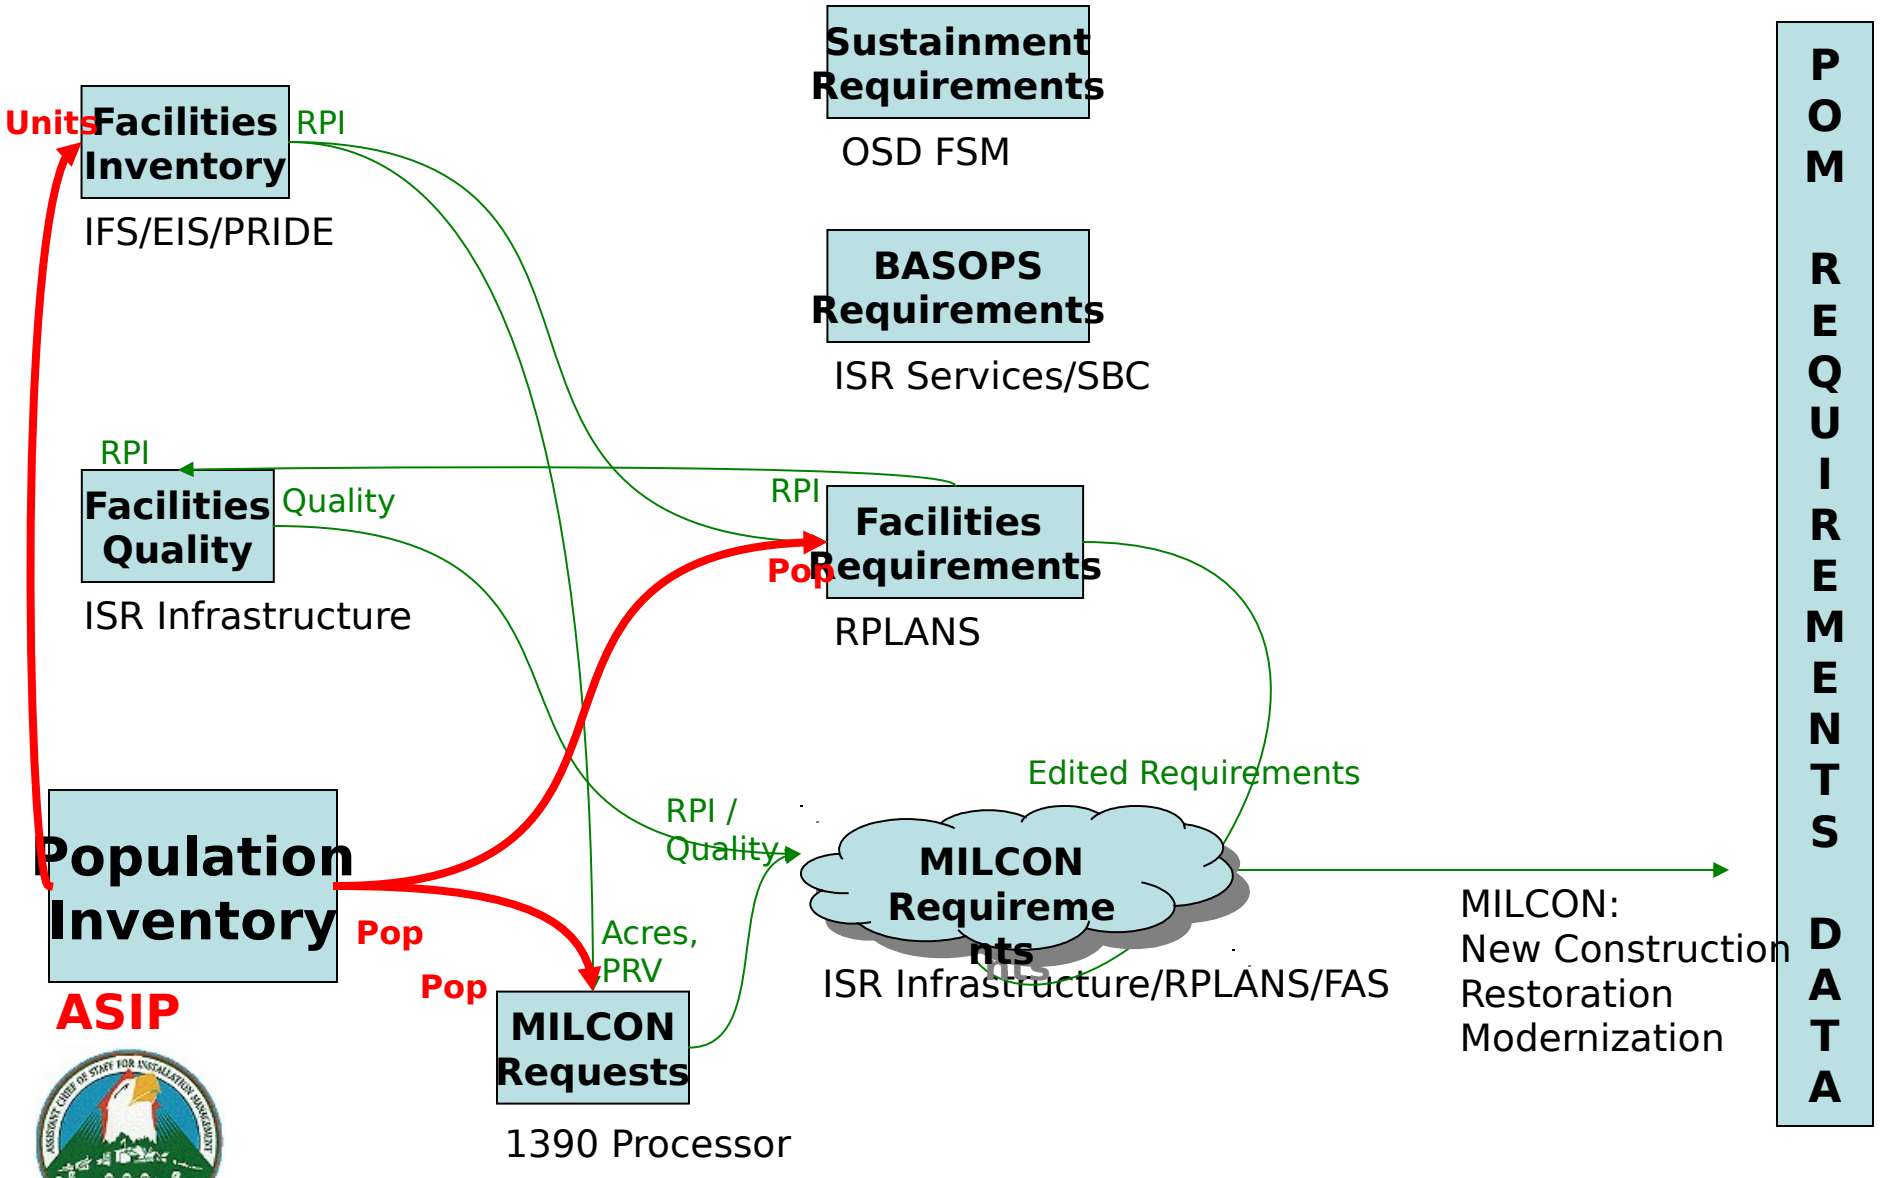
ASIP in BASOPS



ASIP in MILCOM



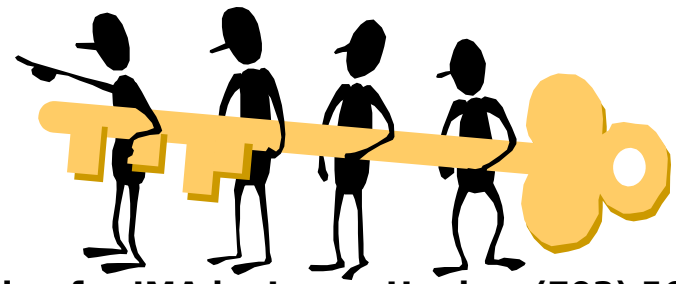
The ASIP . . .

- **Documents Composition and Location of Authorized Army Forces Worldwide**
  - **Seven Year Window**
- **Is Consistent with Approved and Documented Army Force Levels**
  - **Comes from Official Army Sources**
- **Captures Other Tenant Activities (on Army Installations) ***
- **Captures Transient and Training loads on Army installations***

*** Army's Only Source**

The ASIP Provides . . .

- **A Consistent Look at Forces to be Supported**
- **Visibility to Potential Planning Issues**
- **An Audit Trail to Official Army Force Planning/ Documentation**
- **A Feedback Loop to help correct Force Structure Discrepancies**



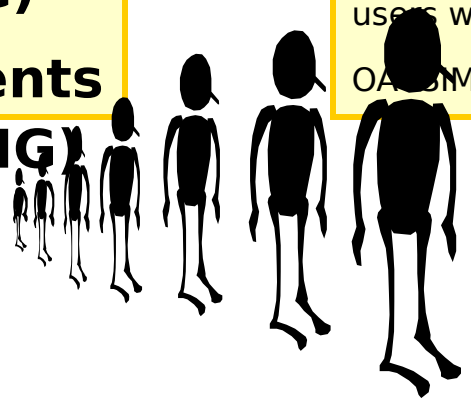
The Key

ASIP Users Include . . .

- **OACSIM**
- **Installation Management Agency (ACSIM – IMA)**
- **Army Staff (ARSTAF)**
- **Army Major Commands (MACOM)**
- **Total Army Basing Study (TABS)-(BRAC)**
- **Reserve Components (RC - USAR and ARNG)**

- **Department of Defense (DoD)**
- **Army Secretariat/Army Audit Agency (AAA)**
- **General Accounting Office (GAO)**
- **etc..**

Note: There are over 1500 registered users with 350 of them being from OACSIM/IMA .



What Information is in the ASIP?

Acronyms Used in ASIP

AGR – Active Guard/Reserve
AIT – Advanced Individual Training
ATRRS – Army Training Requirements and Resources System
BT – Basic Training
FTS – Full Time Support
KATUSA – Korean Augmentees to the United States Army
MTOE – Modification Table of Organization and Equipment
OSUT – One Station Unit Training
PCS –Permanent Change of Station
RC – Reserve Component
TDA – Table of Distribution and Allowances
TDA AUG – TDA Augmentations to MTOE
TDY – Temporary Duty
TOTA – Tenants Other Than Army
UIC – Unit Identification Code
USACE – US Army Corps of Engineers

Units, Organizations, and Loads in ASIP

- **Army Units / Organizations**
  - Active Army, US Army Reserve, Army National Guard
  - MTOE, TDA, and TDA Augmentations to MTOE
- **Army School Loads**
  - PCS, TDY, Trainees, Reception Loads
- **Special Army Populations**
  - Non-Additive Authorizations, RC Full-time Support, AGR
  - Rotational Loads at Army Training Centers
- **Tenants Other than Army**
  - Contractors, Other Services, DoD Agencies, KATUSA, USACE Civil Works, Commercial Activities
- **Below the Line Numbers**
  - RC Training Loads, Other Surrounding Population

How ASIP Populations are Counted

MTOE, TDA, TDA Aug	**Authorizations**
Students – (PCS, TDY)	**Student Loads**
Trainees – BT, OSUT, Receptees	**Billet Load**
Tenants Other Than Army - TOTA	**Full-Time Equivalent / Single Shift Equivalent**
Non-Additive Authorizations (TDA)	**Authorizations**
Full-Time Support / AGR	**Actual**
KATUSA	**Actual**
USACE Civil Works	**Military – Authorizations Civilian - Actual**
RC Training Loads (Below the Line)	**Peak Load Calculations**
Other Surrounding Population (Below the Line)	**Actual**

What are UICs?

The Unit Identification Code (UIC) is a unique six character code assigned to each organization in DOD

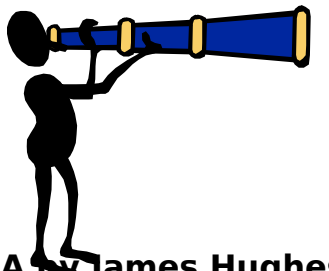
Non DOD units on Army installations are assigned UICs by the local ASIP Manager

DOD Joint Pub 1-03.3 Joint Reporting Structure Status Of Resources and Training System (SORTS) is the Regulatory Requirement for DOD UICs

How do you read an Army UIC?

- 1st Position = W (Army), I (Army Students)
- 2nd Position = Alpha (MTOE), Numeric (TDA), "N" (Multi-Compo)
- 3rd – 4th Position = With 2nd, Form Unique Unit Identifier
- 5th – 6th Position = Parent (AA)/Derivative

Examples: MTOE = WD8PAA, WD8PA0
Multi-Compo TOE = WDAVX1
TDA = W4RCAA, W4RC01



ATRRS School UICs (School Codes)

- 1st Position = I (Army Students)
- 2nd, 3rd, 4th Position = Form Unique Unit Identifier. This is the ATRRS School Code
- 5th – 6th Position = Indicate BT, AIT, OSUT, PCS, TDY, Reception Load

Examples:

BT: I809/B
AIT: I809/T
OSUT: I809/S
PCS: I071/P
TDY: I071/Y I809/Y
Reception Load: I809/R

Tenants Other Than Army (TOTA)

- **Non-DOD**
- **Created by ASIP Manager**
- **UIC is suggested by ASIP system**

Special Characters used in TOTA UICs:

$ = Commercial Activities (Bank)
@ = Contractors and Concessionaires
! = Other Federal Government
 # = Private Organizations
*** = State and Local Governments**

How do you read a TOTA?

- 1st Position = special character.
- 2nd – 4th Position = comes from supporting unit of garrison or ASIP Manager on base
- 5th – 6th Position = Unique serial number

Examples: Banks = $ABC01, $XYZ02
Contractors = @4RC01, @H8P02
State and Local Government = *8A603

Note: The TOTA uic may support a MTOE or TDA. If so, use the undes (unit description) field of the TOTA record to indicate it. Ex. Contractor @4RC01 may support the TDA unit W4RCAA.

First Characters for TOTA

Type	Name	1st char position
AAFES	Army and Air Force Exchange Service	! or 1
AFRC	Armed Forces Recreation Center	!
AIR FORCE	Air Force unit	! or F
BANK	Community Bank	$
COAST GUARD	Coast Guard unit	! or C
COLLEGE	College extension	#
CONCESSION	AAFES or other concessionaire	$
CONTRACTORS	Government Contractors	@
CREDIT UNION	Community Credit Union	$
DLA	Defense Logistics Agency	! or D
DOD AGY	Other DOD Agency	!
FOREIGN GVT	Element of a Foreign Government or Foreign military unit	!
KATUSA	Korean Augmentation to U.S. Army	W
MARINE CORPS	Marine Corps unit	! or M
NAVY	Naval unit	! or N
NON-APPROPRIATED FUND	Any NAF activity	! or X
OTHER ACTIVS	All other organizations not covered in this list	!
POSTAL	U.S. Postal service organization	!
RED CROSS	Red Cross office	#
ST/LOCAL GVT	State or Local Government	*
STARS AND STRIPES	Stars and Stripes Newspaper or bookstore	!
TRAVEL OFC	Travel Office	!
US GOVT OTH	Other U.S. Federal Government	!
USO	United Services Organization	#
UTILITIES	Electrical, Telephone, or other utility organization	$

DOD UICs (Obtained from tenant units)

- Navy: N12345
- Marine Corps: M12345
- Coast Guard C12345
- Air Force: FXXX
  - Alphnumeric
  - Air Force units my give 6 or 8 digit UICs. Use the last 4 digits, that being the unique unit identifier
- DOD: XXXXXX
  - Alphanumeric
- AAFES: 99999 (Store Code)

Decremented Units (MTOE) - Example

- **The ASIP is a zero-sum game! If all Authorizations are represented in derivatives, the parent shows zero strength!**
- **Most MTOE parents show zero strength**

WAYPAA - 2/10 AV BN ASST (UH-60) (0 Strength)

WAYPA0 - Co A	**43**	
WAYPB0 - Co B	**43**	
WAYPC0 - Co C	**43**	
WAYPD0 - Co D		**92**
WAYPE0 - Co E		**105**
WAYPT0 - HHC	**78**	
	Total	
404		

Decremented Units (TDA) - Example

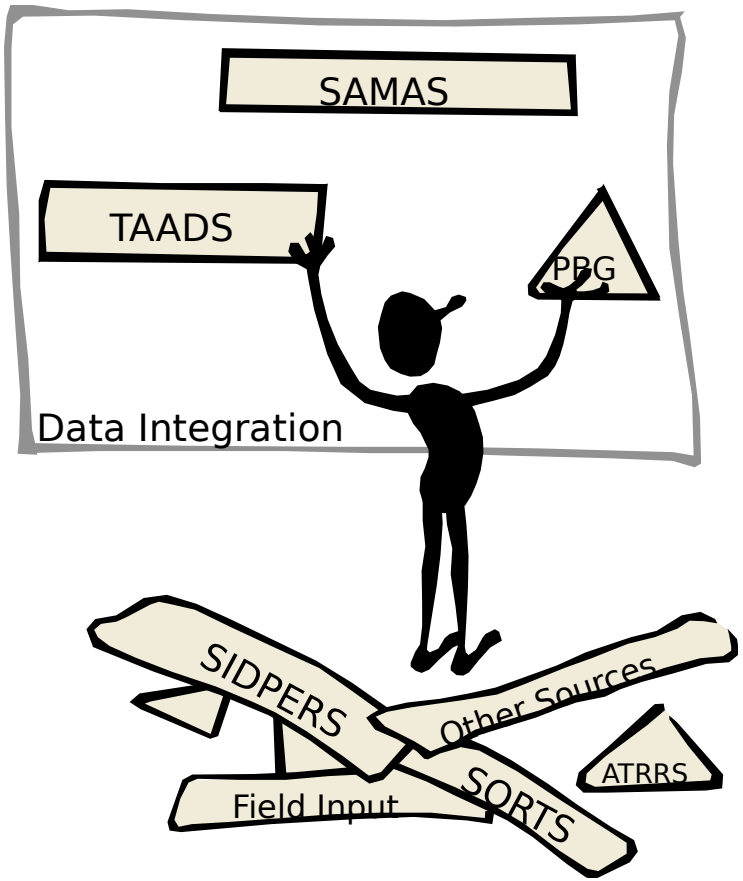
- **Most TDA parents do not show zero strength**
- **Many TDAs include Non-Additive Authorizations**

	Strength	
W1DCAA - Garrison Ft Dix	589	
W1DC03 - Kelly Spt Ctr		58
W1DC04 - DRAFTA	85	
W1DC05 - Ft Dix DOIM		40
W1DCN2 - ARNG AGR		2
W1DCN3 - USAR AGR	___	12
W1DCNA - NONADD		7
	Total	
	793	

Multi-Component Units

- **Multi-component units are composed of active Army and ARNG and/or USAR soldiers**
- **They are identified by the letter "N" in the second position of the UIC**
- **Fifth position is: X = Active Army G = National Guard R = Army Reserve**
- **In 2005, many multi-compo units were inactivated or converted back to pure AC units.**

How is the ASIP Created?



Acronyms Used in ASIP Data Integration

ARLOC – Army Location
ARNG – Army National Guard
AT – Annual Training
ATRRS – Army Training Requirements and Resources System
CCSA – Command and Control Support Agency
DCPDS – Defense Civilian Personnel Database System
FMSA – Force Management Support Agency
GCCS – Global Command and Control System
IDT – Inactive Duty Training
ODT – Overseas Deployment Training
PBG – Program Budget Guidance (Civilian Authorizations)
RC – Reserve Components (US Army Reserve and Army Guard)
SAMAS – Structure and Manpower Allocation System
SIDPERS – Standard Installation/Division Personnel System
SORTS – Status of Resources and Training System
TAP-DB – Total Army Personnel Database
TAADS – The Army Authorization Documents System
TRADOC (IET) – Training Document (Initial Entry Training)
USACE – US Army Corps of Engineers
USAR – US Army Reserve

Data Integration – Bridging the gap from G3 to OACSIM

SAMAS as of 29 JUNE 2005
ASIP DATA DATE: 20-SEP-05
U.S Army Web Page
ACSIM Web Page
Welcome...
The Army Stationing and Installation Plan(ASIP)
The Army Stationing and Installation Plan is the official Army database of populations on Army installations worldwide. It is based on the Structure and Manpower Allocation System (SAMAS) and The Army Authorization Document System (TAADS) as well as many other official Army data sources. The ASIP is a baseline for installation planning that provides a consistent look at forces to be supported and provides visibility of potential planning issues. ASIP data is a basis for Military Construction (MILCON), Installation Status Report (ISR) data collection, Base Operations (BASOPS) Service requirements, and is used by the Army Staff as the database of record for installation demographics. The proponent for the ASIP is the Assistant Chief of Staff for Installation Management (ACSIM). Authority for the ASIP is AR 5-18.
The ASIP Web-Application
This ASIP Web-Application allows an authorized user to query the latest official ASIP data. Users can access ASIP information by query or drilling down either by Installation Management Agency (IMA) Regions, Army National Guard (ARNG) States, or geographically. The ASIP Web-Application provides access to historical ASIP data going back to FY 1993. Standard Reports, Custom Reports, and data export tools are also available. Finally, the ASIP Web-Application allows IMA and ARNG Installation Managers to edit and update tenant information. These updates are subjected to review and approval via the Web-Application by HQ NGB, HQ IMA, and the OACSIM.

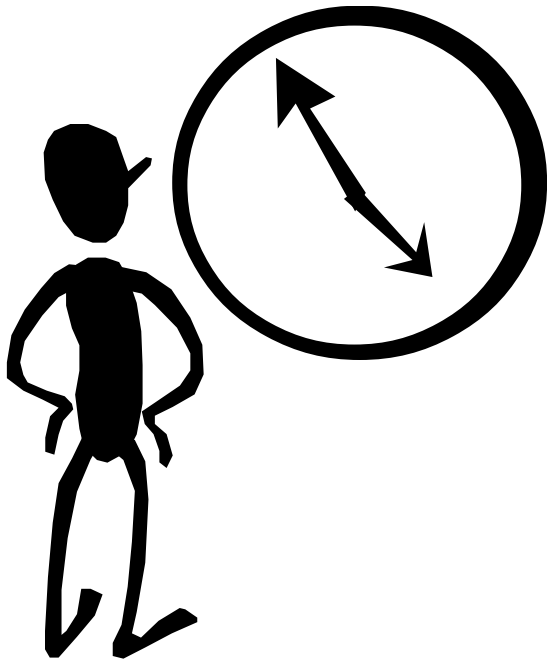
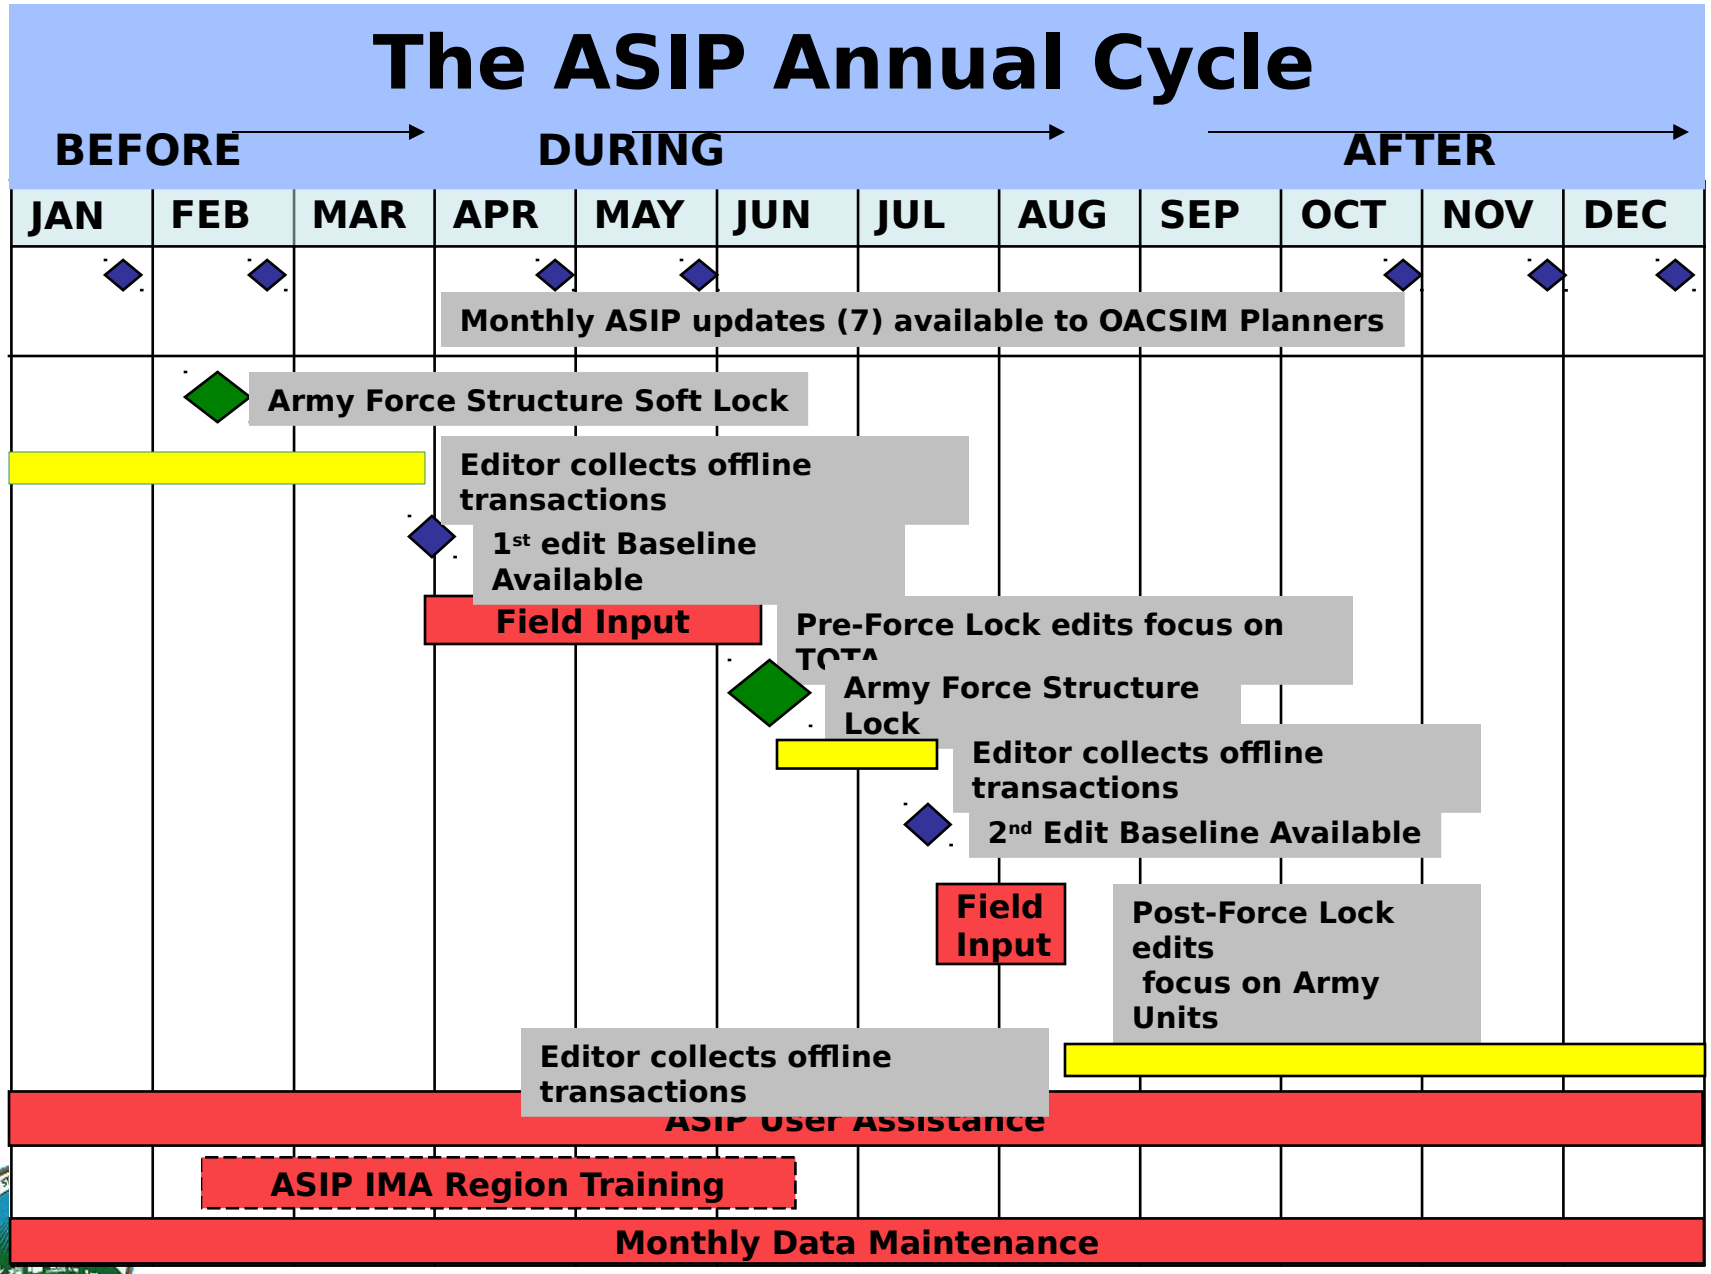
A Year in the Life of the ASIP POC



The ASIP Annual Cycle



Year-round Tasks

Year-round Tasks

1. Maintain ASIP POCs
2. Monitor Unit Actions
3. Monitor Other Systems
4. Keep an ASIP update file

Maintain ASIP POCs and Users

- **Re-Designate an ASIP POC when existing POC leaves or as duties are re-assigned**
- **Alert IMA Region POCs of any changes in duties**
- **Alert the ASIP Team**
- **Cross-train Responsibilities**
- **Identify and register new users**
- **Consistency is the key**

Monitor Unit Actions

- **Stationing Actions**
  - **Units arriving on post**
  - **Units leaving post**
  - **AR 5-10 Stationing Actions**
    - **Pending Action List - example**
- **Force Structure Actions**
  - **Changes in unit strength**
- **Changes in ATRRS Schools**
- **Gather data on *Transient events*. Will submit data via spreadsheet in 2006.**

Monitor Other Systems - Coordinate

- **SAMAS / TAADS / SORTS –** Find contacts for MACOMs, IMA
- **IFS –** Review UIC assignments to facility records in IFS. Share with ISR inspectors
- **RPLANS –** Review edited requirements in RPLANS
- **SBC –** Learn about how ASIP populations are used in SBC Pacing Measure Algorythms
- **ISR –** Have inspectors capture unit data. Share with IFS and ASIP

Keep an ASIP update file

- **ASIP Updates cannot be done out of cycle**
- **Keep notes regarding Unit Actions**
- **Keep notes regarding Other System Issues**
- **Gather data on *Transient activities***

Preparing for the Edit Cycle

Print the ASIP report

- **Prior to the Edit window, print the locked ASIP report (below)**

- **Next, when the edit windo (Edit ASIP) is open print the most current ASIP report fro the Edit Tab.***

Surveying your installation

TIPS

- **Request survey information using the major tenant's chain of command**
- **Use data from previous surveys as a baseline**
- **Combine survey efforts with collection and verification of RPI and ISR data**
- **Collect unit/organization POC information to make subsequent surveys easier (Use the UNIT POC button at top)**
- **Use email wherever possible**
- **Talk to the right person**
  - **Familiarity with MTOE or TDA is key**

Sources of Information

- Installation Organization Chart
- Phone Books
- Contracting Office
- MP's
- Safety office
- Fire Marshal
- ISR Point of Contact
- IFS Point of Contact
- Contact lists
  - New ASIP contact feature
- Mission Tenants' chains of command
- KATUSA database
- Previous Surveys
- etc...

ASIP Survey Spreadsheets

- **Separate MTOEs, TDAs, and Non-Army tenants on spreadsheet**
- **Contractors**
  - **Query Army units and Non-Army tenants for contractor data**
  - **Local contract offices will not have all contract data**
- **Non-Army tenants should be your priority, especially during the first edit window**
- **Send out electronically and use the tenant chain of command**
- **Make unit an annual reporting requirement for tenants**

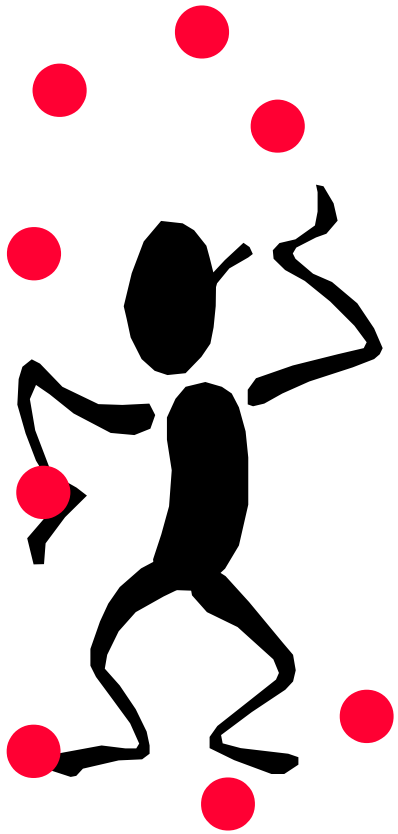
Tasks during the Edit Cycle



First Edit Cycle

- Approximately 1 April through 15 June
- Emphasis
  - Non-Army Tenants
    - Create, delete, and edit tenant units / organizations
  - Make sure Army Units are at the correct installation
  - Create and Maintain undocumented derivatives of Army units
  - Provide Transient information to the ASIP team via spreadsheet at the end of the first edit window

The Army Force Structure Lock

- **SAMAS**
  - **Covers the entire POM period**
  - **Military and Civilian end strength**
  - **Unit description data**
  - **Stationing data**
- **TAADS**
  - **New MTOEs and TDAs are added**
  - **New derivatives are identified**
  - **Old derivatives are removed**
- **SORTS**
  - **New derivative level stationing data is available**
- **Other sources**
  - **SIDPERS, ATRRS, Field input, USACE**

Second Edit Cycle

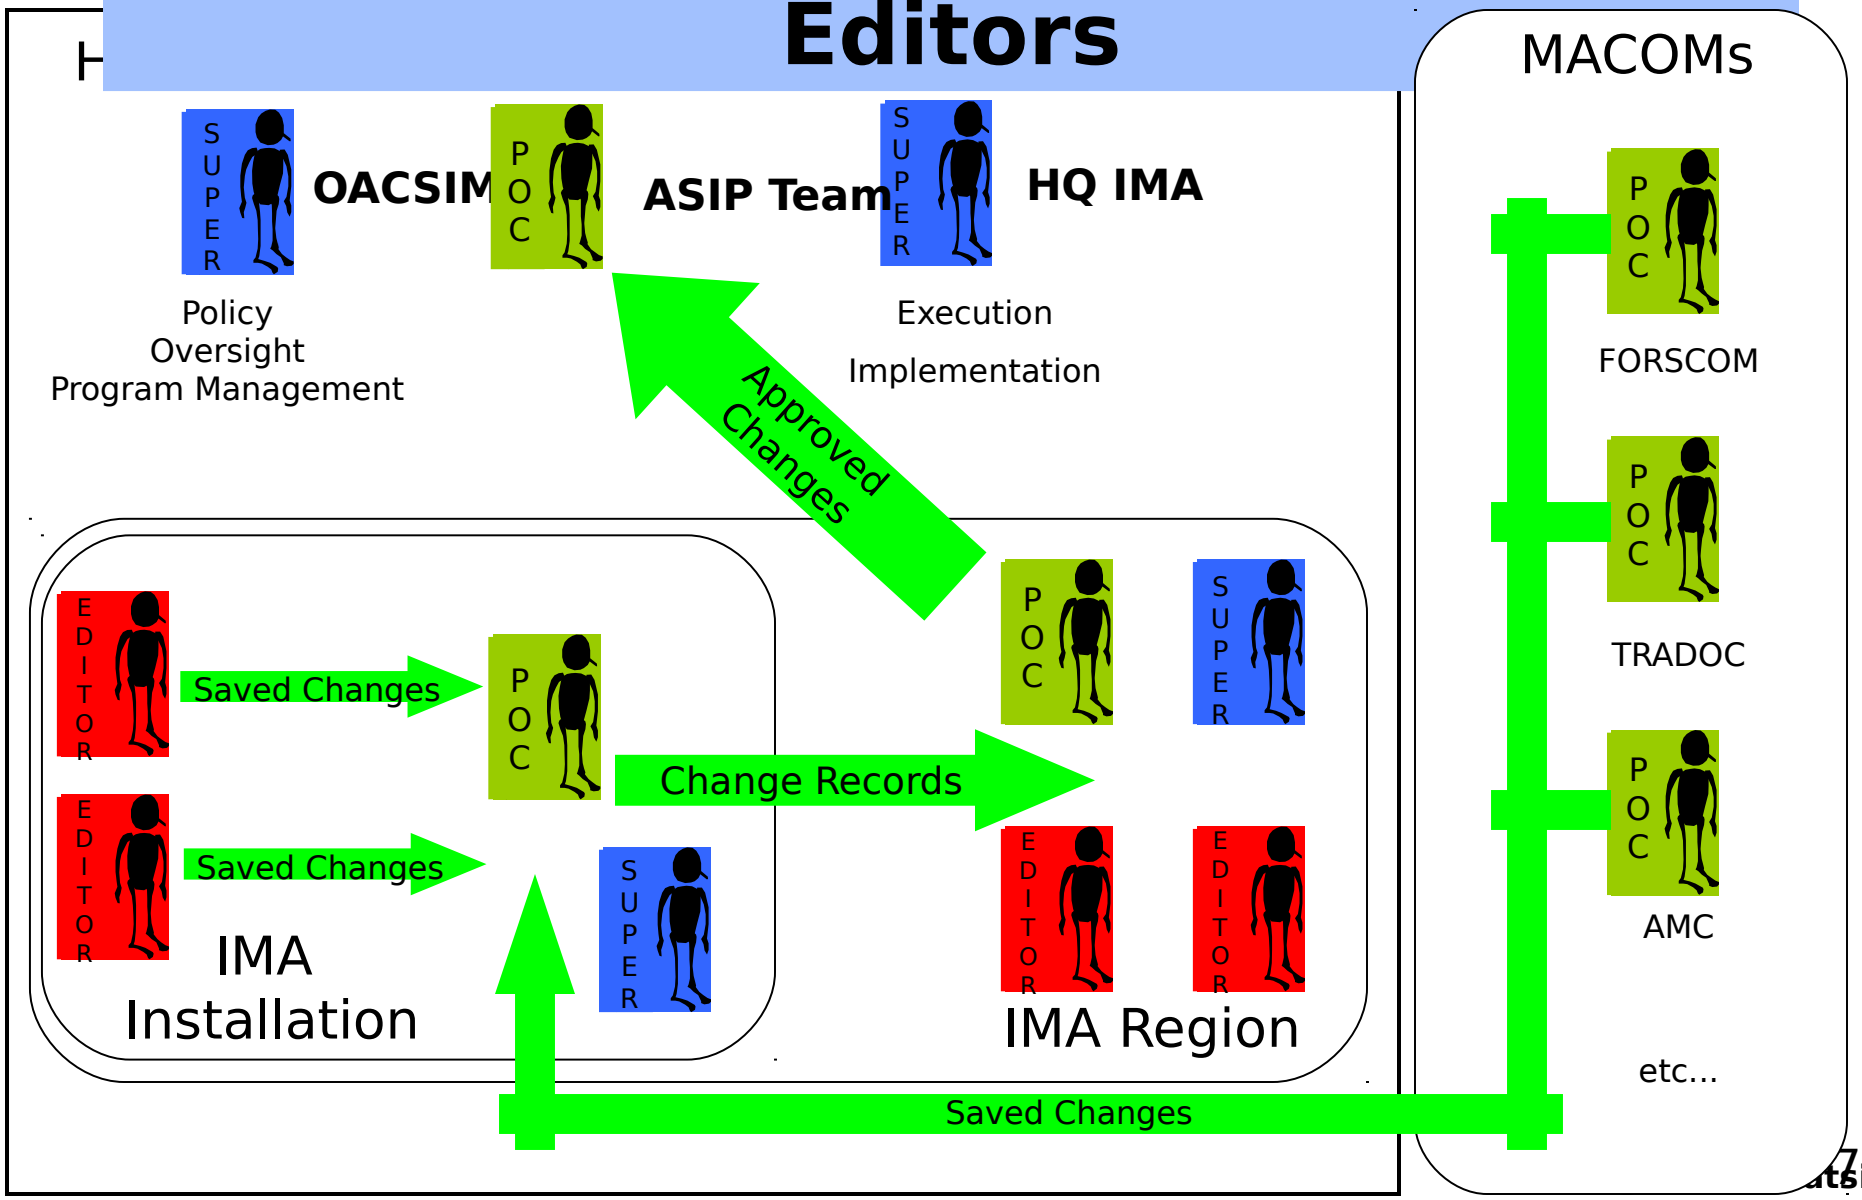
- Occurs after the Army Force Structure Lock
  - Approximately 15 July through 15 August

- Emphasis
  - Double check work done in 1st edit cycle
  - Enter new data that has surfaced since the 1st edit cycle
  - Make sure the Force Lock has not moved Army units
  - Check undocumented derivatives
    - Often these undocumented derivatives have become documented and may constitute a double count
  - Conduct a sanity check on the end strengths of Army units and derivatives

Manage Subordinate Editors

- **Allows ASIP POCs to designate subordinate editors and supervisors (Group Management Tool)**
- **Subordinate editors**
  - **Can SAVE changes but cannot SUBMIT changes**
  - **Can view all edit data for the installation**
- **Supervisors (or key individuals)**
  - **Can view all edit data for the installation**
  - **Cannot create changes**
- **Function added in 2004**

Supervisors and Subordinate Editors



Print the DELTA Report

- The DELTA Report
  - Shows all changes to any units in your domain
  - Can compare multiple ASIP positions
    - Consist of the Edited Baseline plus any submitted changes to the previous year's locked ASIP
    - Consist of the Edited Baseline plus any submitted changes to the previous edit cycle's endpoint
- The DELTA Report is NOT a certification requirement

The DELTA Report.

The DELTA Report shows the differences in unit strength and unit information that occur on a single base from one ASIP report to another. The strength figures you see are differences, not actual strengths. The DELTA report answers the question: What Changed from last year?

Manage your work

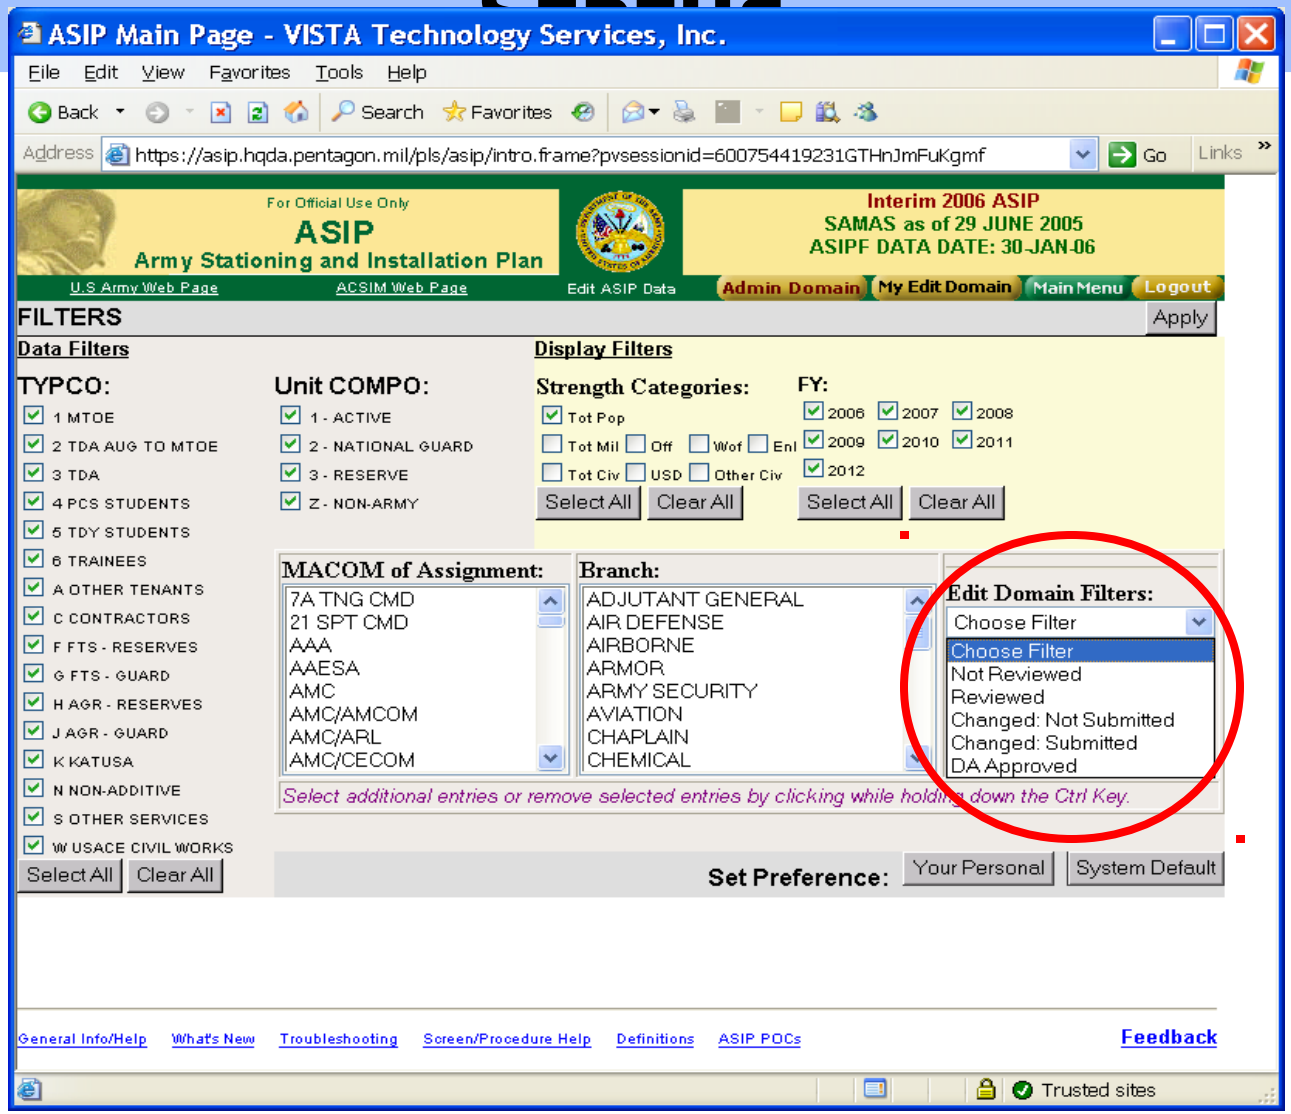
Filtering Units for Reviewed Status



Add, Edit, and Delete Non-Army Tenants

- **Students logon to http://asip.hqda.pentagon.mil/training**
- **Demonstration by the Instructor**
- **Additional help in Online Help, the ASIP Users Manual, and the ASIP 102 Editing document**

Move Army Units

- **Students logon to http://asip.hqda.pentagon.mil/training**
- **Demonstration by the Instructor**
- **Additional help in Online Help, the ASIP Users Manual, and the ASIP 102 Editing presentation**

Add, Edit, and Delete Army Undocumented Derivatives

- **Students logon to http://asip.hqda.pentagon.mil/training**
- **Demonstration by the Instructor**
- **Additional help in Online Help, the ASIP Users Manual, and the ASIP 102 Editing document.**

Editing Army Units

- **ASIP must maintain consistency with the Army Force Structure**
  - **ASIP cannot create or delete authorizations**

- **What can you do?**
  - **Move units to the correct location**
  - **Edit TAADS Derivative outyear strengths**
  - **Create, Edit, and Delete undocumented derivatives**

TIPS

- **Always look at the <u>SOURCE</u> field**

- **Use the Parent / Child view (button at left of screen)**

Editing Non-Army Units

- **Account for population correctly**
  - **Full-Time Equivalent**
  - **Single Shift Equivalent**

- **Reserve / Air National Guard part-time elements**
  - **Credit for 1/10 drilling population**

Track Changes

- As you submit changes, periodically check the Status of Submissions tool

- This tool shows
  - All changes you have submitted
  - Any changes submitted in your domain by other editors
  - All approval actions that have been taken on all changes in your domain
  - All notes that have been entered for all changes in your domain

Approval at IMA Regions

- Approvals
  - Demonstration
- Declines
  - The Declined Change Message
    - Always read the note
- Conflicts
  - When more than one editor has edited and submitted changes to the same unit
  - When more than one change record account for more than the total strength of the unit

Processing at HQDA

- What checks are made?

- When does HQDA reject a change record?
  - When the change has already been entered
  - When the change is overcome by events
  - At the request of IMA Regions and Installations
  - To resolve conflicts
  - When source data cannot be overridden
  - When the change must be entered in a different way

- What can editors do to help?
  - Write useful notes
  - Read Decline messages carefully
  - Allow enough time to react

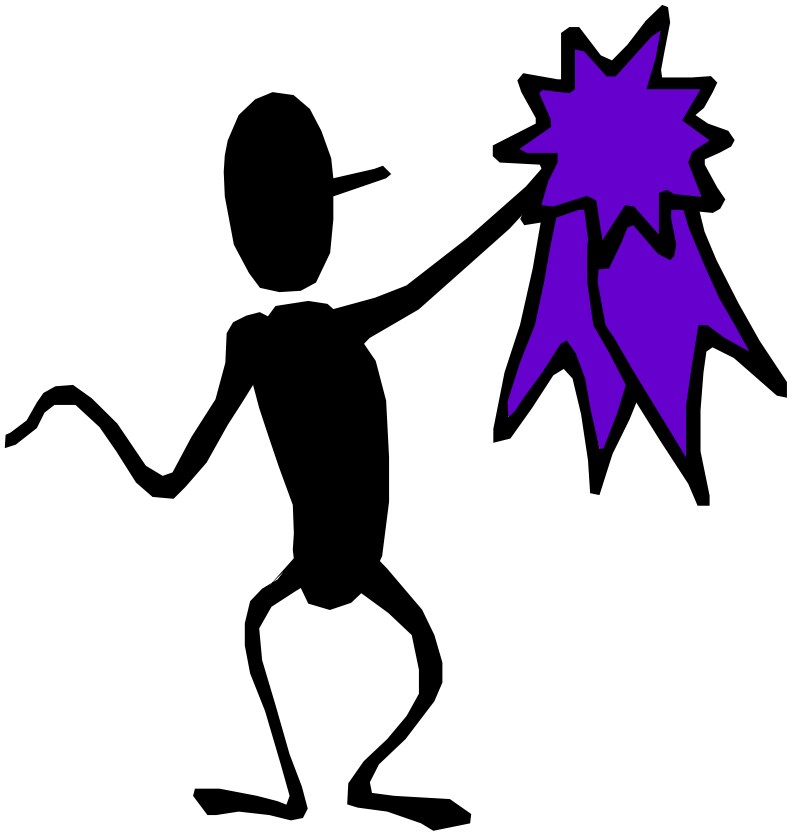
Special Situations

- Overhires
  - Report Full-Time Equivalent
  - Report as Tenants Other Than Army
    - read “Tenants Other Than Army Authorizations”
- KATUSA / KSC
  - Obtain source information from respective organizations
- Other Surrounding Population
  - Review processes
  - OCONUS – Review APO – Installation crosswalk
- RC Training
  - Review Processes
  - Review previous year’s numbers

Provide Transient Information to the ASIP Team

- **2006 Edit cycle**
  - **Provide data on spreadsheet via email**
- **Future Edit cycles**
  - **Review source data and provide additional information once the Transient Training Module becomes available**

Certification



Certification Concept

- **2006 Certification**
  - **Driven by desire to improve data quality**
  - **Command Emphasis**
  - **BRAC data should be included in the 2006 ASIP**
  - **Data quality is key**
  - **Participation is always important**

DEPARTMENT OF THE ARMY
ASSISTANT CHIEF OF STAFF FOR INSTALLATION MANAGEMENT
600 ARMY PENTAGON
WASHINGTON, DC 20310-0600

S: 30 Sept 2005

DAIM-ZS

AUG 1 2 2005

MEMORANDUM FOR

Director, Headquarters Installation Management Agency, ATTN: IMAH-PLD, 2511 Jefferson Davis Highway, Arlington, VA 22202-3926
Chief, National Guard Bureau, ATTN: Installations Division, 111 South George Mason Drive, Arlington, VA 22204

SUBJECT: Certification of 2005 Army Stationing and Installation Plan (ASIP) Data

1. Installation Management Agency (IMA)/Army National Guard (ARNG) reporting locations must certify the accuracy of their ASIP data. Certification documents are due to the Office of the Assistant Chief of Staff for Installation Management (OACSIM) NLT 30 September 2005. All certifications must be endorsed by IMA/ARNG before forwarding to OACSIM.

2. Final ASIP edits must be entered by 15 August 2005 to be included in the 2005 ASIP. ASIP reporting locations and associated managers are provided at Enclosure 1. ASIP certification memorandum examples for IMA, IMA Reserve Office and ARNG are provided at Enclosures 2, 3, and 4, respectively.

3. Base Realignment and Closure actions should not be included in the 2005 ASIP. Modularity transformation and stationing actions are included if they are reflected in approved G3 Force Structure documents. Integrated Global Presence and Basing Strategy (IGPBS) stationing actions are reflected if they are documented by official orders. A "Commanders Certification Briefing Template" was developed to assist ASIP managers with the certification process (Enclosure 5).

Certification Processes from 2005

- Conducted during 2nd Edit Cycle
  - 15 August suspense
- Installations
  - Review ASIP
  - Input changes
  - Prepare Certification letter
    - Discuss Installation specific issues
- IMA Regions
  - Collect Installation Certifications
  - Send to HQ IMA with cover letter

After the ASIP Lock

How Does ASIP Data get to other OACSIM Systems?

- **IFS/EIS**
- **RPLANS**
- **ISR Infrastructure**
- **ISR Services/SBC**
- **1390 Processor**

ASIP Data in RPLANS

- ASIP Lock (September 18 & March 15)
  - File is provided to RPLANS Team
  - Data is available with December update of RPLANS
  - Data is also available during the summer update of RPLANS

- IFS Allows obsolete UICs to be registered against facility records
  - RPLANS has a specific report that addresses this
  - “UIC not in ASIP” error is caused by this situation

- RPLANS creates Major Units data from ASIP data

ASIP Data in IFS

- UIC and unit description data is provided to IFS upon ASIP lock (September 18 & March 15)
  - UIC data is appended to existing UIC data
  - UIC data is available with the next database update (January)
  - Obsolete UICs are <u>not</u> purged from database
    - Obsolete UICs can remain against facility records
      - Causes problems in RPLANS
      - RPLANS generates a specific report detailing the problem

ASIP Data in EIS

- **ASIP data is provided to EIS upon ASIP lock (September 18)**

- **EIS only displays Full-Time ASIP data**
  - **Compo 1 and Z (Active and Non-Army) are displayed**
  - **Compo 2 and 3 are discarded**
  - **This is not readily apparent in the interface**

ASIP Data in ISR

- **ASIP data in ISR Infrastructure comes from RPLANS**
- **Population data**
  - **Compo 2 and 3 discarded**
- **UICs against facility records**
  - **Same inherent problems as in RPLANS**
  - **EIS allows obsolete UIC data to remain against facility records**

ASIP Data in ISR / SBC

- **ASIP data from the annual lock is provided to ISR Services / SBC in the November timeframe**
  - **Data is available in the command viewer in January**

- **ASIP Unit Data (above the line)**
  - **provided by Compo and Typco**
  - **Summed at the Base level**
  - **Off/WO/Enl/USD/Other Civilian detail**

- **ASIP Other Surrounding Population and RC Training Data**
  - **Provided as shown in the ASIP report**
  - **One number per category per Base**

ASIP Data in the 1390 Processor

- **ASIP data is provided to 1390 Processor in October**
- **Data is available in the system upon next update**
  - **January Timeframe**
- **Data is used to justify Military Construction (MILCON) projects to Congress**

Timeline for ASIP Data in other Systems

Systems	Received by	Posted on Web
• RPLANS	September 18 December & March 15	July
• IFS/EIS	September 18 January	
• ISR	November	January
• 1390 Processor	October *& March 15*	January July

Historical ASIP Data

- 1996 through 2004 data is available online

- Characteristics of the Historical data set
  - Some normalization of data has been accomplished
  - IMA relationships have been projected into the past
  - MACOM ownership relationships have been projected to present day
  - Coding is not always consistent with present usages
    - Example DLA is coded ASGMT = 'DL' in present
    - Prior to 2000 DLA was coded ASGMT 'DF'

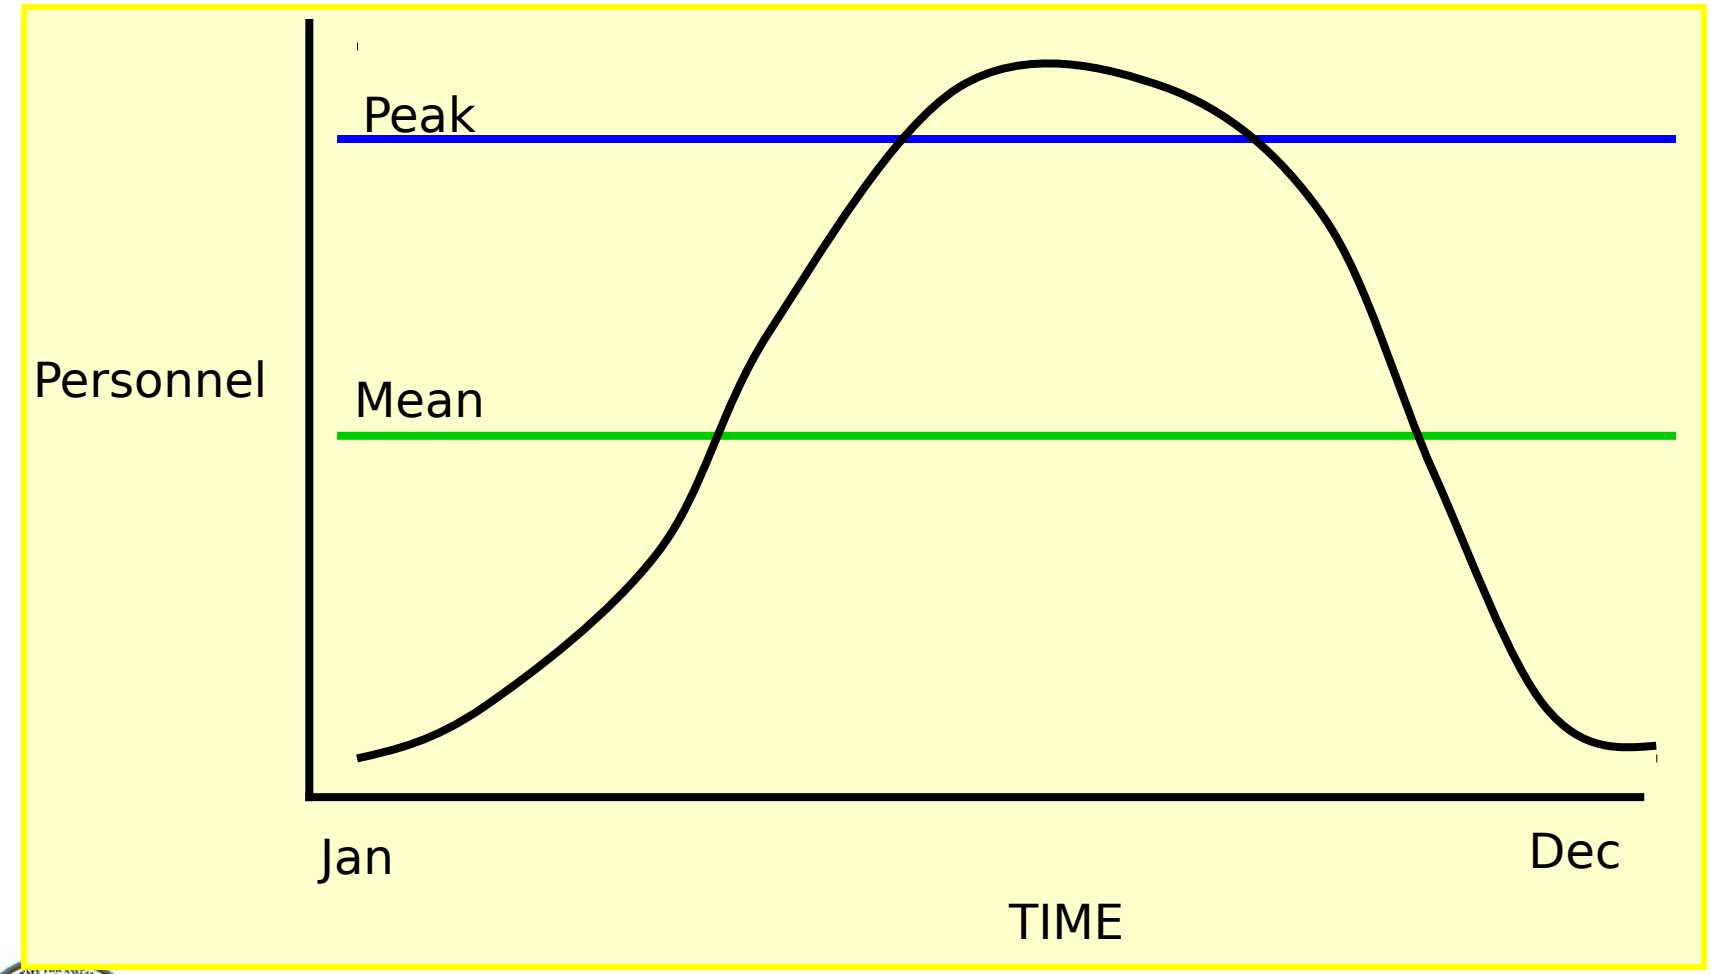
  - ***Inactive Duty Training****
  - ***Overseas Deployment Training****
- **Non Army Training**
  - **Other Military Services**
  - **Other Government Agencies**
  - **Non-Government Events**

** Currently captured in ASIP from official sources*

Transient Situations in ASIP



Transient Situations in ASIP -Current Rules-

- Peak Calculations
  - RC Training
  - ATRRS Billet Loads
- Mean Calculations
  - ATC Rotations
  - ATRRS Student Loads
  - AC Training not in ATRRS
  - Full-Time Equivalent
  - Single Shift Equivalent

Transient Situations in ASIP -Future Processing Rules-

- Facilities Requirements → Peak Load
- Services/General Purpose → Mean Load

Transient Training - Solutions

Short Term:

- **Calculate ARNG and USAR ADT and IDT loads from best sources**
- **Ensure RPLANS Algorithms generate appropriate Transient Training Facilities**

Mid Term:

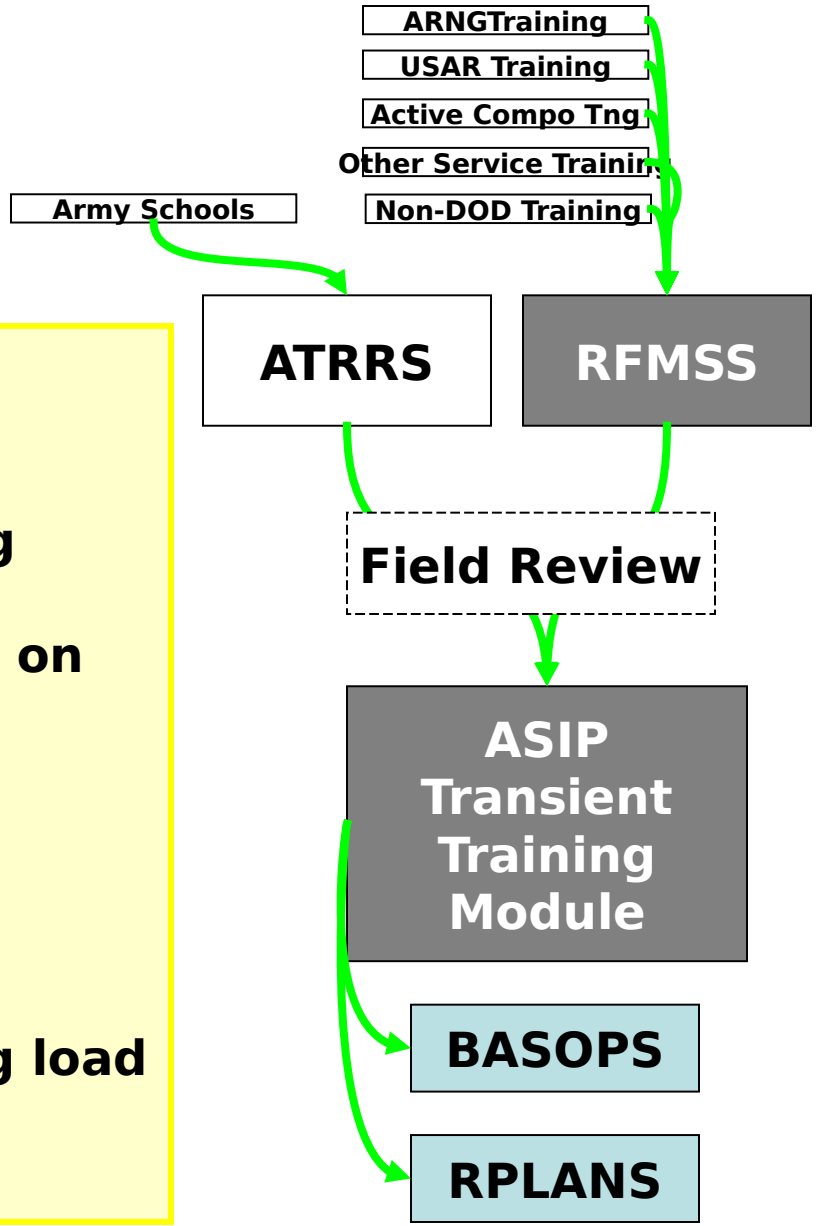
- **Increase visibility of training loads by assigning it a new TYPCO**

Long Term

- **Ensure G3 fixes major flaws in RFMSS**
- **Create an Army Transient Training Module in ASIP to generate load data appropriate to facilities requirements generation in RPLANS and BASOPS requirements generation in SBC**
- **Capture all types of training events in one consolidated**

Transient Training – Army Transient Training Module

- Leverage previous work
- Create a comprehensive, high resolution database of all transient training events
- Allow field validation of training on an installation
- Create query tools for Transient Training events and loads
- Outputs generated:
  - Generalized average training load for various training types to be placed "above the line" in ASIP
  - Tailored facilities loads for



Transient Training Module for ASIP

- **Prototype data architecture and interface will be completed in the near future (Currently unfunded)**
- **Offline data run will occur during this edit year**
  - **Data will be passed into other ACSIM systems**
- **Data will be made available to field in 2006 edit cycle**
